# Hakkımızda

1999 yılından günümüze hem yurtiçi hem yurt dışı tedarik, uygulama ve projelendirme konularında edindiğimiz tecrübelerle hizmet veren kurumumuz; sizlerin ihtiyacına uygun ithal ve yerli tüm doğal taş ürünleri seçim ve tercihlerinize sunuyoruz.

Granit, Mermer, Traverten ve Butik Hamam, Heykel, Fıskiye, Masa, Sütun vb. butik ürünleri isteğinize göre projelendirip, ebatlı ya da plaka şeklinde hazırlayıp sizlerle buluşturuyoruz.

Geniş ürün yelpazesi yerli ve ithal tüm doğal taş çeşitlerimizle profesyonel çözüm ortağınız olarak hizmetinizdeyiz.

## About Us

Our institution, which has been providing services based on the experiences we have gained in both domestic and international supply, application, and project planning since 1999, offers you imported and domestic natural stone products tailored to your needs and preferences.

We design and prepare boutique products such as granite, marble, travertine, boutique baths, sculptures, fountains, tables, columns, etc., according to your requests, and present them to you in customized dimensions or in slab form.

With our wide range of products, including both domestic and imported natural stone varieties, we are at your service as your professional solution partner.

## Über Uns

Unser Unternehmen bietet seit 1999 sowohl im Inland als auch im Ausland Dienstleistungen aufgrund der Erfahrungen an, die wir in den Bereichen Beschaffung, Anwendung und Projektplanung gesammelt haben. Wir bieten importierte und einheimische Natursteinprodukte an, die Ihren Bedürfnissen und Vorlieben entsprechen.

Wir gestalten und bereiten Boutique-Produkte wie Granit, Marmor, Travertin sowie Boutique-Bäder, Skulpturen, Brunnen, Tische, Säulen usw. gemäß Ihren Wünschen vor und präsentieren sie Ihnen in individuellen Abmessungen oder in Form von Platten.

Mit unserer breiten Produktpalette, die sowohl einheimische als auch importierte Natursteinvarianten umfasst, sind wir Ihr professioneller Lösungspartner.

## **mermer çeşitleri**

Modern, minimal, Retro yerli ve ithal mermer çeşitleri **Gramer Stones** kalitesi ile sizlerle. Türkiye'nin yüksek kalite standartlarına sahip tek üretim merkezimiz. Müşterilerimizi her zaman en kaliteli ürünlerle buluşturmak için azimle çalışıyoruz.

Profesyonel ekibimiz tarafından geliştirilmiş tüm ürünler evinize ve ofisinize modern bir görünüm sağlar. Yüzlerce kalem ürünü sizler için mermer ve granit çeşitleri kategorisi üzerinde listeledik. Boyutlarına, renklerine, desenlerine, modellerine ve isimlerine göre ayırdık.

Ürünlerimizi inceleyerek mermer çeşitleri, isimleri, özellikleri, renkleri hatta özel üretim mermer çeşitleri ve mutfak ürünleri hakkında dahi bilgi sahibi olabilirsiniz.

Tüm bu çeşitlerin haricinde sizlere denizlik mermer çeşitleri, dünyadaki mermer çeşitleri, mermer fayans çeşitleri, ithal mermer çeşitlerini de sunuyoruz. Her zaman en iyisi, en özel tasarımlardan oluşan özel bir seçki hazırladık.

### **marble types**

Modern, minimalist, Retro domestic and imported marble varieties with Gramer Stones quality are with you. We are the only production center in Turkey with high quality standards. We work diligently to always bring our customers together with the highest quality products.

All products developed by our professional team provide a modern look to your home and office. We have listed hundreds of items for you in the marble and granite varieties category. We have categorized them according to their sizes, colors, patterns, models, and names.

## granit çeşitleri

Granit, taneli oluşumlu sert, kristal ve magmatik yapılı bir üründür. Granitin içindeki maddeler genellikle çıplak gözle görülebilir. Granit, feldspatin ortoklas ile az miktarda plajoklas ve kuvarstan oluşur.

Genellikle çok yaygın olarak bulunan granit, farklı yer kabuğu modelleri ile görünür. Granit yeryüzünün temelini oluşturan maddeler içinde yer alır. Granit doğada; granitler, dayk, silis ve batoliter şeklinde bulunur.

Ülkemizde inşa edilen yeni nesil konutlarda çokça kullanılan granit, ithal bir üründür. Granitin kullanıldığı yerlere bakıldığında genel anlamda park-bahçe, yol ve kaldırım düzenlemelerinde parke ve bordür taşı, adım taşı, harpušta vb. vazgeçilmez bir yapı taşı olarak kullanılan granit, inşaatı yapılan binalarda da cephe kaplama, bina veya apartman girişleri, duvar kaplama, zemin döşemesi, merdiven basamakları döşemesi, duş, WC ve banyo zeminleri, mutfak tezgahları, balkon zemin döşemeleri gibi alanlarda sık miktarda kullanılır.

### granite types

Granite is a hard, crystalline and magmatic product with a granular structure. The substances in granite are usually visible to the naked eye. Granite is composed of orthoclase feldspar with small amounts of plagioclase and quartz.

Granite, which is generally very common, is seen with different crustal models. Granite is among the materials that form the basis of the earth. Granite is found in nature in the form of granites, dikes, sills and batholiths.

Granite, an imported product, is widely used in new generation houses built in our country.

When we look at the places where granite is used, it is generally seen as an indispensable building material in park-garden, road and sidewalk arrangements, as paving and curb stone, stepping stone, harpušta etc. Granite is also used in large quantities in buildings under construction in areas such as facade cladding, building or apartment entrances, wall cladding, floor covering, stair step covering, shower, WC and bathroom floors, kitchen countertops, balcony floor coverings.

### granitarten

Granit ist ein hartes, kristallines und magmatisches Produkt mit einer körnigen Struktur. Die Bestandteile des Granits sind normalerweise mit bloßem Auge sichtbar.

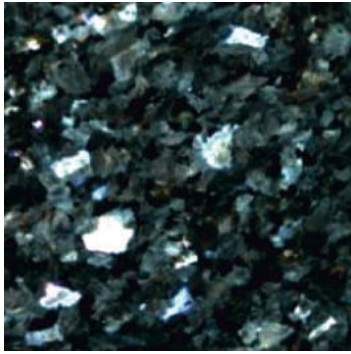

Granit besteht aus Orthoklas-Feldspat mit geringen Mengen Plagioklas und Quarz. Granit, der allgemein sehr verbreitet ist, wird in verschiedenen Krustenmodellen beobachtet.

Granit gehört zu den Materialien, die die Basis der Erde bilden. Granit kommt in der Natur in Form von Graniten, Gängen, Sills und Batholithen vor.

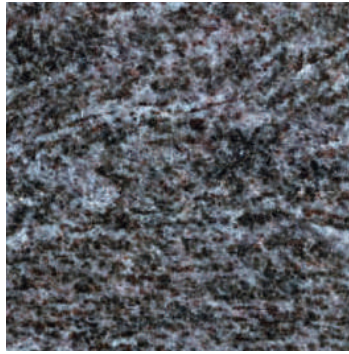

Granit, ein Importprodukt, wird in Neubauten in unserem Land häufig verwendet. Wenn man sich die Einsatzorte von Granit ansieht, stellt man fest, dass es im Allgemeinen als unverzichtbarer Baustoff in Park- und Gartenanlagen, Straßen- und Gehwegenlagen, als Pflaster- und Bordstein, Trittstein, Harpušta usw. verwendet wird. Granit wird auch in großem Umfang in Gebäuden im Bau in Bereichen wie Fassadenverkleidung, Gebäude- oder Wohnungseingänge, Wandverkleidung, Bodenbeläge, Treppenstufenbeläge, Dusch-, WC- und Badezimmerböden, Küchenarbeitsplatten, Balkonböden verwendet.

## onix çeşitleri

GRAMER  
STONES

Yarı saydam bir taş olan oniks taşı mermer ve granite göre çok daha zor çıkarılan ışık geçirgen bir taştır. Mermer oluşumu hakkında şunu diyebiliriz; ısı basınç ve suyun tazyiki ile oluşmuş olan bu kireç taşları içlerinde, suda bulunan tuz ve kristallerin ve silisyumun etkisiyle harika bir akik taşına dönüşmüştür.

Oniks mermer özellikleri itibari ile çok tercih edilen bir üründür. Oniks mermer yatakları, mermer yataklarına göre daha derinlerde bulunur. Oniks mermer ocakları Türkiye'de, Adıyaman ilinin Tut ilçesinde bulunmaktadır.

Bilinen oniks mermer çeşitleri ve mermer renkleri şunlardır; Şeffaf oniks mermer, sarı oniks mermer, bal oniks mermer, yeşil oniks mermer, beyaz oniks mermer, pembe oniks mermer, kırmızı oniks mermer, siyah oniks mermer ve mavi oniks mermer olarak çıkarılmaktadır.

### onix types

Onyx is a translucent stone that is much more difficult to extract than marble and granite. It is a light-transmitting stone. Regarding the formation of marble, we can say that these limestones, formed by the pressure of heat and water, have turned into a wonderful agate stone under the influence of salt, crystals and silicon found in water.

#### Onyx Marble:

Onyx marble is a highly preferred product due to its characteristics. Onyx marble deposits are found deeper than marble deposits. Onyx marble quarries are located in the Tut district of Adıyaman province in Turkey.

#### Types of Onyx Marble:

The known types of onyx marble and marble colors are extracted as follows: Transparent onyx marble, yellow onyx marble, honey onyx marble, green onyx marble, white onyx marble, pink onyx marble, red onyx marble, black onyx marble and blue onyx marble.

### onix sorten

Onyx ist ein halbttransparenter Stein, der viel schwieriger abzubauen ist als Marmor und Granit. Es ist ein lichtdurchlässiger Stein. Über die Entstehung von Marmor lässt sich sagen, dass sich diese Kalksteine, die durch den Druck von Hitze und Wasser entstanden sind, unter dem Einfluss von Salz, Kristallen und Silizium im Wasser in einen wunderschönen Achatstein verwandelt haben.

#### Onyxmarmor:

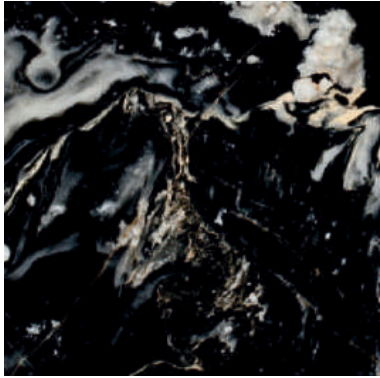

Onyxmarmor ist aufgrund seiner Eigenschaften ein sehr beliebtes Produkt. Onyxmarmorlagerstätten befinden sich tiefer als Marmorlagerstätten. Onyxmarmorbrüche befinden sich im Landkreis Tut der Provinz Adıyaman in der Türkei.

#### Onyxmarmorarten:

Die bekanntesten Onyxmarmorarten und Marmorfarben werden wie folgt abgebaut: Transparenter Onyxmarmor, gelber Onyxmarmor, Honigonixmarmor, grüner Onyxmarmor, weißer Onyxmarmor, rosa Onyxmarmor, roter Onyxmarmor, schwarzer Onyxmarmor und blauer Onyxmarmor.

## traverten çeşitleri

**T**raverten çeşitlerimizde dolgulu, dolgusuz. Honlu ve honsuz. Eskitme, cilalı yüzey bitirme uygulamalarına istinaden bir çok renk vardır. Kesimlerde Cross Cut ve Vein cut olarak kesim modelleri bulunur. Dünyanın pek çok bölgesinden çıkarılan bu ürün, bilindiği üzere ülkemizde Afyon, Sivas ve Denizlik çevresinde çıkarılmaktadır.

Travertenlerin hem doğal dokusu hem de yapı malzemesi olmaya yatkınlığı inşaat sektöründe önemli bir konuma gelmiştir. Aslında mermer sınıfından bir kayaç türü olan bu malzeme, yapı itibari ile mermerden farklı özellik gösterdiği için farklı isimle anılır. Diğer doğal taşlar gibi örneğin; mermer ve granit gibi türlere göre çok daha yumuşak ve kolay işlenebilir niteliktedir.

Traverten firmamızda bordür, havuz kenarı, harpuşa, yer karosu gibi birçok ürünlerin üretimini yaparak eskitme, honlu, dolgulu, dolgusuz ve ham yüzey uygulamaları ile yapmış olup en iyi üreticiler arasındadır.

### travertine types

**W**e have a wide range of colors in our travertine varieties, including filled and unfilled, honed and unhoned. There are also cutting models such as Cross Cut and Vein Cut. This product, which is extracted from many parts of the world, is known to be extracted in our country in the vicinity of Afyon, Sivas and Denizli.

#### Travertine in Construction:

Both the natural texture of travertines and their tendency to be building materials have made them important in the construction sector.

#### Travertine vs. Marble:

Although this material is actually a type of rock from the marble class, it is called by a different name because it shows different properties from marble due to its structure. It is much softer and easier to work with than other natural stones such as marble and granite.

#### Travertine Products:

Our travertine company produces many products such as borders, poolside, harpuşa, and floor tiles with aging, honed, filled, unfilled and raw surface applications and is one of the best manufacturers.

### travertin typen

**W**ir haben eine große Auswahl an Farben in unseren Travertinsorten, einschließlich gefüllter und ungefüllter, geschliffener und ungeschliffener Sorten. Es gibt auch Schneidemodelle wie Cross Cut und Vein Cut. Dieses Produkt, das in vielen Teilen der Welt abgebaut wird, ist bekanntermaßen in unserem Land in der Nähe von Afyon, Sivas und Denizli zu finden.

#### Travertin im Bauwesen:

Sowohl die natürliche Textur von Travertinen als auch ihre Neigung, Baustoffe zu sein, haben sie im Bausektor wichtig gemacht.

#### Travertin vs. Marmor:

Obwohl dieses Material eigentlich eine Gesteinsart aus der Marmor-Klasse ist, wird es aufgrund seiner Struktur, die sich von Marmor unterscheidet, mit einem anderen Namen bezeichnet. Es ist viel weicher und leichter zu bearbeiten als andere Natursteine wie Marmor und Granit.

#### Travertinprodukte:

Unsere Travertinfirma produziert viele Produkte wie Bordüren, Poolumrandungen, Harpunen und Bodenfliesen mit Antik-, geschliffenen, gefüllten, ungefüllten und rohen Oberflächenanwendungen und gehört zu den besten Herstellern.

# HAKKIMIZDA

1999 yılından bu yana müşterilerine en iyi hizmeti, en uygun fiyatlara sunmayı hedef edinen **Gramer Stones** ailesi olarak hedefimiz, global bir marka olmaktır.

Profesyonel kadromuz ve işinde uzman çalışanlarımızla çıktığımız bu uzun serüvende çok yol katettik. Kaliteden ödün vermeden, sağlam ve estetik projelere imza attık. Granitin görsel büyüsunü ve yapısal dayanıklılığını onlarca yapı ile buluşturduk ve lüks görünümlü yaşam alanları inşa ettik.

Mükemmeliyetçi bir yaklaşımla ele aldığımız işlerimizi, en yüksek kalite standartlarında, yasal gerekliliklere uygun olarak ve doğaya saygılı biçimde gerçekleştirmeye çalışıyoruz.

Sahiplendiğimiz tüm projelere modernliği ve prestiji taşıdık. Bununla yetinmeyip, proje alanına da değer katacak işlere imza attık. Üstlendiğimiz tüm projelerde seçici davranarak pek çok bina, yol, hastane ve okul yaptık. Yenilikçi bir yaklaşımla dokunduğumuz her mekâna zarafeti, kaliteyi ve sağlamlığı getirdik.

**Gramer Stones** şirketi olarak, yurt dışında da ülkemizin adını duyurmak ve doğal taş sektöründe global bir marka hedefiyle Türkiye'nin bu alanda elçiliğini yapmak bize onur veriyor.

## ABOUT US

As the Gramer Stones family, our goal has been to provide the best service to our customers at the most affordable prices since 2006. Our aim is to become a global brand.

We have come a long way in this long journey with our professional staff and expert employees. We have undertaken solid and aesthetic projects without sacrificing quality. We have brought the visual magic and structural durability of granite together with dozens of structures and built luxurious living spaces.

We strive to carry out our work, which we approach with a perfectionist approach, in accordance with the highest quality standards, legal requirements and in a way that respects nature.

We have brought modernity and prestige to all the projects we have undertaken. We did not stop there and signed projects that would add value to the project area. We have built many buildings, roads, hospitals and schools by being selective in all the projects we have undertaken. We have brought elegance, quality and durability to every space we have touched with an innovative approach.

As the Gramer Stones company, we are honored to promote our country's name abroad and to act as Turkey's ambassador in this field with the goal of becoming a global brand in the natural stone sector.

## ÜBER UNS

Seit 2006 ist es unser Ziel, als Gramer Stones Familie unseren Kunden den besten Service zu den günstigsten Preisen anzubieten. Unser Ziel ist es, eine globale Marke zu werden.

Mit unserem professionellen Team und unseren fachkundigen Mitarbeitern haben wir auf diesem langen Weg viel erreicht. Wir haben solide und ästhetische Projekte ohne Qualitätseinbußen realisiert. Wir haben die visuelle Magie und die strukturelle Haltbarkeit von Granit mit Dutzenden von Gebäuden vereint und luxuriöse Wohnräume geschaffen.

Wir bemühen uns, unsere Arbeit, die wir mit einem perfektionistischen Ansatz angehen, nach den höchsten Qualitätsstandards, den gesetzlichen Anforderungen und in einer naturnahen Weise zu gestalten.

Wir haben allen unseren Projekten Modernität und Prestige verliehen. Wir haben uns damit nicht zufrieden gegeben und Projekte unterzeichnet, die dem Projektgebiet einen Mehrwert verleihen werden. Durch Selektivität in allen von uns übernommenen Projekten haben wir viele Gebäude, Straßen, Krankenhäuser und Schulen gebaut. Mit einem innovativen Ansatz haben wir jedem Raum, den wir berührt haben, Eleganz, Qualität und Robustheit verliehen.

Als Unternehmen Gramer Stones sind wir stolz darauf, den Namen unseres Landes im Ausland bekannt zu machen und als Botschafter der Türkei in diesem Bereich zu fungieren, um eine globale Marke im Natursteinsektor zu werden.
